Expt 2

STUDY OF DIFFERENT TYPES OF NETWORK CABLES.

AIM:

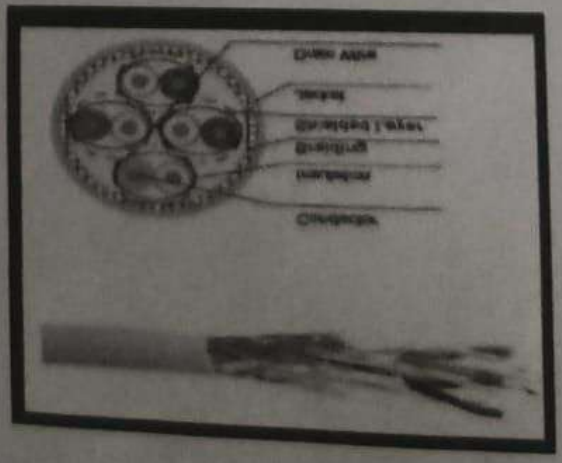

Understand different types of Network cable in Compute network.

Cable Type	Category	Maximum data transmission	Advantages/ Disadvantages	Applications use.
UTP	Category 3	10 Kps	Advantages: *Cheaper in cost. *Easy to install as they have a smaller overall diameter Disadvantage: * More prone to (EMI) electromagnetic interference and noise	10 Base -T Ethernet Fast ethe Gigabit et
	Category 5	upto 100 mbps		
	category 5e	1 Gbps.		
STP	Category 6,6a	10Gbps	Advantages: *Shielded *Faster than UTP *Less susceptible to noise and interference Disadvantages: *Expensive *Greater installation effort	Gigabit 10G Ethe (55 m) Widely u in data c
SSTP	Category 7	10Gbps		Gigabit ethern 10G eth (100m)

Shielded twisted pair

Cable Type	Category	Maximum data Transmission	Advantages/ Disadvantages	Applications/ Use.
Coaxial cable	RG-6 RG-59 RG-11	10 -100 Mbps	Advantages: *High band width *Immune to interference * Low Loss band width * Versatile Disadvantages: *Limited distance *Cost * size is bulky	speed of signal 50cm Television network High speed inter connections.
fibre optics cable	single mode Multimode	100 Gbps.	Advantages: *Highspeed * High band width *High security. * Long distance Disadvantages: *Expensive *Requires skilled Installers	Maximum dista of fibre optics cable is arou 100 meters.

Result;

Thus, we have learned the different types of cab used in computer network.
