Develop a Customized Ping Command to Test the Server Connection.

AIM:

To develop a customized ping utility in python that checks the connectivity between a client and a server by sending ICMP echo request packets and displaying the response time, packet statistics, and server reachability status.

PROCEDURE:

* Install python 3.10 or later and a code editor such as VS code.
* Create a python file named ping.py.
* import the required modules: subprocess and platform.
* Accept the hostname or IP address from the user.
* Detect OS using platform module.
* Ping Command:
    * ping -h 4 <host> for windows
    * ping -c 4 <host> for Linux.
* Display ping results.

Result:

The customized ping program was executed successfully. It checked the connectivity to the specified server and displayed whether reachable or unreachable and ping response details.

```
File Edit Format Run Options Window Help
import subprocess
import platform

print("="*50)
print(" Customized Ping Utility")
print("="*50)

host = input("Enter Website or IP Address: ")

system = platform.system()

if system == "Windows":
 command = ["ping", "-n", "4", host]
else:
 command = ["ping", "-c", "4", host]

try:
 result = subprocess.run(command, capture_output=True, text=True)

 print("\nPing Results\n")
 print(result.stdout)
 if result.returncode == 0:
  print("Server Status : Reachable")
 else:
  print("Server Status : Unreachable")

except Exception as e:
 print("Error:", e)
```
