Ex:9

Design a Simple Network Topology Using Cisco Packet Tracer.

Aim:

To design and configure a network using one router, t switches, and four PCs in Cisco Packet Tracer and verify communication between the devices.

Procedure:

* Open Cisco Packet Tracer.
* Add one router, two switches and four PC
* Connect the devices using Copper straight Through co
* Configure the router interfaces with IP addresses 192.168.1.1 and 192.168.2.1.
* Assign IP address, subnet masks, and default gatewa to all four PCs.
* Open the PC command Prompt and use the Ping co to test connectivity between PCs
* Check the ping output to verify successful commu

Result:

Thus, a simple network topology was designed and configured successfully using Cisco Packet Tracer, and communication between the devices was verified using th
